Dr. Jane E. Henney, Commissioner  
Food & Drug Administration  
5600 Fishers Lane, HF-1  
Rockville, MD 20857

Dear Commissioner Henney,

We are very concerned about the lack of adequate safety testing on genetically altered food products, and horrified by the possibilities of creating environmental problems with these products. We do NOT believe that the companies developing these products have the interest of the environment or farmers or consumers at heart. They are looking for a way to increase their bottom line.

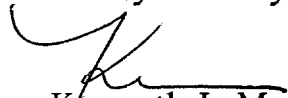

We strongly urge you to support the demands of the lawsuit for safety testing and complete labeling on these seeds and food products. I resent being made a guinea pig! It is your duty to protect us from the threats this misguided technology as Commissioner for the Food and Drug Administration. Please take the lead in protecting public health and the environment

We would appreciate knowing your thoughts and the action you plan to take regarding this truly vital issue.

Sincerely,

Nancy B. Macy, MAT
